Welcome to Elvedes, your trusted partner in the world of cycling since 1965. Dedicated to providing premium quality products, we ensure that every bike can be safely brought back to the road. From our base in the Netherlands, we proudly support bicycle manufacturers, wholesalers and retailers all across the globe.

In the world of cycling and beyond, Elvedes is **your reliable partner for just-in-time deliveries**.

Our well-structured stock-keeping strategy of semi-manufactured goods and our advanced assembly facility allows us to deliver innovative, high-quality solutions tailored to the needs of cycling professionals and enthusiasts alike.

This catalog presents an extensive range of our aftermarket products and **serves as a comprehensive handbook** for selecting the right disc brake pads, bearings, and bottom brackets using Elvedes' product guides.

Wherever in the world you're reading this, thank you for choosing Elvedes as your trusted partner. Our product catalog is a gateway to exploring premium quality products as well as an open invitation to new distribution partners to join us on our journey. With craftsmanship and enthusiasm, **we spread the joy of cycling together**.

OUR HISTORY

On February 8, 1965, Lourens van der Spruijt officially registered Technische Handelsonderneming L. van der Spruijt with the Chamber of Commerce. The company's first invoice was issued the following day, February 9, to the bicycle specialist Staals in Utrecht, marking the beginning of a journey that continues to this day.

In the early years, Lourens supplied products directly to specialty shops, offering a range of moped parts such as sprockets, pistons, buddy seats, and notably, raised handlebars. These extra-high handlebars created a demand for longer cables, and the need for cables expanded beyond the two-wheeler sector into various other industries.

To meet this demand, Lourens established the brand Elvedes, named after the initials of L. van der Spruijt (L-V-D-S), pronounced as "ell-vee-dez".

Around 1977, the company decided to focus exclusively on the assembly and distribution of mechanical control cables, serving both the two-wheeler industry and other sectors. The Elvedes brand expanded its reach to wholesalers and, subsequently, to retailers.

Over the years, Elvedes became a trusted name in the Benelux region and beyond, gaining popularity among cycling enthusiasts and various industries. In 2002, Lourens passed the leadership to his sons, Carl and Peter, who continued to grow the brand. They diversified the product range, transforming Elvedes into a one-stop shop.

60 years after its founding, Elvedes has flourished into a remarkable family business. Its products are now available in the aftermarket worldwide, symbolizing quality, innovation, and reliability.

60 YEARS ELVEDES

1965

Founding

In 1965, Lourens van der Spruijt founded 'Trading company L. van der Spruijt', setting the stage for what would later become Elvedes. Operating from his Opel Rekord station wagon, he travelled across the Netherlands, selling bicycle and moped parts like cables, gears, and handlebars to retailers and workshops. Lourens handled production of bike and moped cables in small batches and was known for his customer-first approach and visited clients personally to build strong relationships. His dedication and entrepreneurial spirit established the foundation for Elvedes' future success.

Direct Sales

Noticing a demand for longer cables for popular mopeds like Kreidler and Zündapp (handlebars were going up at that time) Lourens began producing custom cables to meet this need. In 1968, he shifted from direct sales to retailers, choosing to work with wholesalers and bike manufacturers. This strategic move expanded Elvedes' reach and allowed Lourens to scale up production while maintaining quality. Targeting wholesalers provided access to a broader market and drove early growth.

1968

1977

Cable Grease Nipple

In 1977, Lourens introduced the innovative cable grease nipple, a small but impactful product that simplified cable maintenance and extended the life span. The grease nipple became a widely-used component and highlighted Elvedes' commitment to technical advancements, strengthening its reputation as an innovative brand.

New Building in Elshout

By 1989, Elvedes had grown significantly and required more space. The company moved to a new 450 m² building in Elshout, marking a milestone in its ability to expand production. This facility enabled increased efficiency and allowed Elvedes to handle growing demand, positioning the company as an established player in the industry.

1989

2002

Next Generation - From Father to Sons

In 2002, Lourens' sons joined the company, with Carl entering in 1999 and Peter in 2002. This transition was the beginning of a new era as the brothers began taking over daily operations, allowing their father to enjoy his well-earned retirement. With this new generation Elvedes continued to grow, with a fresh drive for innovation and modernization that honoured the company's roots.

2012

Filed for Patent

Elvedes filed its first patent in 2012 for a specialized cable clamp bolt tailored for Shimano roller brakes. This innovation underlined the company's dedication to advancing technology in the cycling industry. Securing this patent protected Elvedes' intellectual property, distinguishing it as a leader in product development and enhancing its reputation for innovation.

New Building in Nieuwkuijk

Elvedes' growth necessitated a move to a larger, 2600 m² facility in Nieuwkuijk in 2015. The new building allowed for streamlined logistics and increased production and stock capacity, enabling Elvedes to meet rising demand. With this transition the company's was ready for future expansion.

2015

2025

60-Year Anniversary!

As Elvedes approaches its 60th anniversary in 2025, it celebrates six decades of growth and innovation. From its humble beginnings to becoming a leading name in the bicycle parts industry, Elvedes remains true to its core values of quality and customer service. This milestone is both a celebration and a reflection on the company's enduring legacy and achievements with a team of highly committed colleagues.

A LITTLE EXTRA

'Plus' is a word derived from Latin, meaning 'more.' Ever since Elvedes was founded, we have always strived to do a little more. When we introduced high steerers for mopeds in the sixties, the existing moped cables needed extra length. This demand led Elvedes to add more varieties of cables to the range—not only for mopeds and bicycles, but for all kinds of custom purposes.

Over the years, more and more bicycle service parts have been added to our collection. We offer convenient displays for better organization and a more efficient workshop. We have disc brake pads—not just the common types—but also rim brake pads with special compounds that are quieter and more powerful. Our twist-fit bottom brackets not only provide greater stability for the bearings but are also more durable, as the bearings themselves can be replaced when worn. And much more.

We believe that these smart additions and solutions make life just a little more convenient for mechanics and consumers alike. To draw more attention to these products, we are introducing the Elvedes + label, which makes them easily recognizable throughout this catalog. The label, along with a single highlighted sentence, explains why each item is such a valuable addition.

Elvedes +

This label can be found at different items throughout the catalog. It tells you why this particular item is such a big plus.

HOW TO EXTEND THE LIFE SPAN OF YOUR DISC BRAKE PADS

Bedding in Disc Brake Pads for Better Braking Power, Less Noise, and a Longer Lifespan

First, clean the rotor with brake cleaner and install the new brake pads.

STEP 1

Increase the contact surface between the brake pad compound and the rotor to prevent squeaking and abrupt braking behavior.

Drive for approximately 2 minutes at a speed of around 25 km/h while lightly holding the brake (dragging the brake) to gradually wear the compound onto the brake disc, maximizing the contact surface.

STEP 2

Transfer friction material from the brake pad into the pores of the brake disc surface to enhance braking power and reduce noise by introducing heat into the brake compound.

Drive at a speed of around 25 km/h and brake down to approximately 5 km/h (without stopping completely). Repeat this process 10 times. The brake pads are now ready for use.

GREY

- + Super soft compound
- + Noise reducing
- + For any noisy disc brake
- + Excellent problem solver

BLUE

- + Soft compound
- + Comfortable and reliable
- + For gravel bike, road bike, trekking bike and MTB
- + Excellent for daily and sporty use

BLACK

- + Medium compound
- + Powerful
- + For cargo bike, e-bike and MTB
- + Excellent for heavy duty

GOLD

- + Hard compound
- + Wear and heat resistant
- + For commercial cargobike, e-bike and downhill MTB
- + Excellent for intensive use

PACKAGING OPTIONS

XXXX - CARD

All disc brake pads can be ordered per card, containing 1 pair.

Necessary pins and clips included with all types of disc brake pads on card.
Fits Discovery display (page 89)

XXXX - BOX

Selected disc brake pads can be ordered per box, containing 10 pairs.

Fits Padfinder display (page 88)

XXXX - BOX25

Selected disc brake pads can be ordered per box, containing 25 pairs.

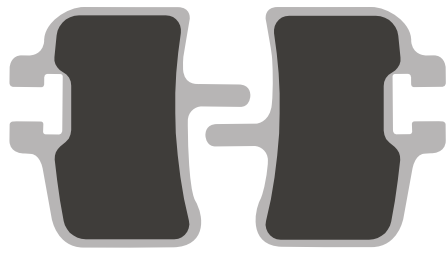

Fits Padfinder display (page 88)

ROTORS IN ORIGINAL THICKNESS FOR THE ORIGINAL BRAKE FEELING

BRAND	MODELS	THICKNESS
Formula	All models	1.8 mm
Hayes	All models	1.8 mm
Hope	All models	1.8 mm
Shimano	All models	1.8 mm
SRAM / Avid	All models	1.8 mm
Magura	All models	2.0 mm
Tektro	TR-16, 19, 22, 24, 35, 46, 47, 52, 53	1.8 mm
	TR-17, 45, 47E, 54	2.3 mm
TRP	RC03M	1.8 mm
	RS01M, RS02M	1.8 mm
	TR-25, 29, 33	1.8 mm
	RC01E, 03E, 04E	2.3 mm
	RS01E	2.3 mm
	TR-42	2.3 mm

6-HOLE ROTOR

Stainless steel, excluding bolts

2024111	Ø140 mm	1.8 mm
2023026	Ø160 mm	1.8 mm
2023027	Ø180 mm	1.8 mm
2023028	Ø203 mm	1.8 mm
2023029	Ø220 mm	1.8 mm
2023030	Ø160 mm	2.0 mm
2023031	Ø180 mm	2.0 mm
2023032	Ø203 mm	2.0 mm
2023033	Ø220 mm	2.0 mm
2023035	Ø180 mm	2.3 mm
2023036	Ø203 mm	2.3 mm
2023037	Ø220 mm	2.3 mm

CENTRA-LOCK ROTOR

Stainless steel, excluding lock-ring

2024112	Ø140 mm	1.8 mm
2023038	Ø160 mm	1.8 mm
2023039	Ø180 mm	1.8 mm
2023040	Ø203 mm	1.8 mm
2023041	Ø220 mm	1.8 mm
2023042	Ø160 mm	2.0 mm
2023043	Ø180 mm	2.0 mm
2023044	Ø203 mm	2.0 mm
2023045	Ø220 mm	2.0 mm
2023047	Ø180 mm	2.3 mm
2023048	Ø203 mm	2.3 mm
2023049	Ø220 mm	2.3 mm

6-HOLE ROTOR WITH SENSOR MAGNET

Stainless steel, excluding bolts

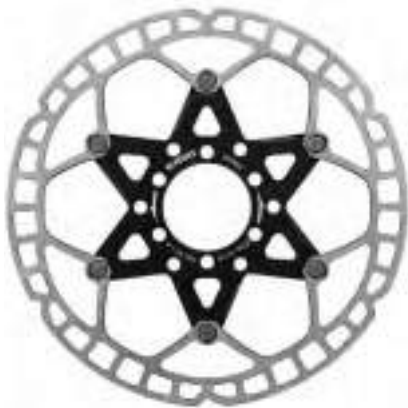

2023050	Ø160 mm	1.8 mm
2023051	Ø180 mm	1.8 mm
2023052	Ø203 mm	1.8 mm

CENTRA-LOCK ROTOR WITH SENSOR MAGNET

Stainless steel, excluding lock ring

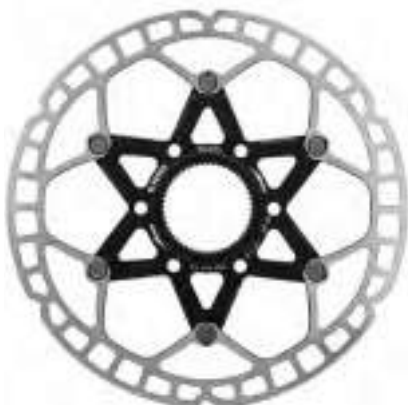

2023054	Ø160 mm	1.8 mm
2023055	Ø180 mm	1.8 mm
2023056	Ø203 mm	1.8 mm

LIGHT WEIGHT 6-HOLE ROTOR

Stainless steel, aluminium core, excluding bolts
Thickness: 1.8 mm

2023022	Ø140 mm	85 g
2023023	Ø160 mm	105 g

LIGHT WEIGHT CENTRA-LOCK ROTOR

Stainless steel, aluminium core, excluding lock ring
Thickness: 1.8 mm

2023024	Ø140 mm	99 g
2023025	Ø160 mm	117 g

VOLUME BOX

All Elvedes outer cables have MoS2 enriched liner for lower friction and higher performance.

The outer cable volume boxes come with an easy pull reel made of 100% recycled and 100% recyclable plastic.

The boxes are also equipped with a unique GripClip, which prevents the outer cable from slipping back into the box after cutting.

The cable type is indicated by the letter A, B, C or D

VOLUME BOX

Elvedes hydro hose is reinforced with a braided housing and has a PVDF liner, which makes it suitable for both mineral oil and DOT fluid. The hydro hose volume boxes come with an easy pull reel made of 100% recycled and 100% recyclable plastic. The boxes are also equipped with a unique GripClip, which prevents the hose from slipping back into the box after cutting.

PULLY WHEELS

All pulley wheel bearings are produced complying with ABEC 3 or ABEC 5. All pulley wheel bearings are provided with extra grease for higher durability and performance.

2 × 10 TEETH

CP2017231 1 set

ABEC 3 with extra grease
Stainless sealed bearing

Including spacers compatible with:

- A - Shimano 8 speed
- B - Shimano 7 speed, Campagnolo 8 speed
- C - Campagnolo 9 / 10 speed
- D - SRAM (one hole upper pulley) 9.0SL ('98) / 9.0 ('97 - '98) / 7.0 ('97 - '98) / 5.0 ('98 - '99)"

2 × 11 TEETH

CP2017086 1 set

2017086-BOX 10 sets

2017086-BOX25 25 sets

ABEC 3 with extra grease
Stainless sealed bearing

Including spacers compatible with:

- A - Shimano 8 / 9 / 10 / 11 speed & 10 speed GRX
- B - Shimano 7 speed, Campagnolo 8 speed
- C - Campagnolo 9 / 10 speed
- D - SRAM 7.0 / 9.0 ('97 - '99)"

2 × 11 TEETH

CP2023086 1 set

ABEC 3 with extra grease

Stainless sealed bearing

Compatible with Shimano 12 speed

11 + 13 TEETH

2022004 1 set

ABEC 5 with extra grease

Stainless sealed bearing

Compatible with:

Shimano 11 speed GRX

RD-RX810-GS

RD-RX812-GS

RD-RX815-GS

RD-RX817-GS

2 × 11 TEETH

CP2017100 1 set

ABEC 5 with extra grease
Stainless sealed bearing

Compatible with:
Shimano 9 / 10 / 11 speed & 10 speed GRX
SRAM X0 / X9 / X7 9 speed MTB > 2011
SRAM X0 / X9 / X7 10 speed MTB
SRAM Apex / Rival / Force 10 speed road
(bushing included)
Campagnolo 11 speed

2 × 13 TEETH

CP2019103 1 set

ABEC 5 with extra grease
Stainless sealed bearing

Compatible with:
Shimano RD-M9100 / M8100 / M7100

2 × 12 TEETH

CP2017101 1 set

ABEC 5 with extra grease
Narrow / wide
Stainless sealed bearing

Compatible with:
SRAM X01 / XX1 / X1 GX 1×11 speed
SRAM Rival 1 / Force 1 1×11 speed

12 + 14 TEETH

CP2017102 1 set

ABEC 5 with extra grease
Narrow / wide
Stainless sealed bearing

Compatible with:
SRAM Eagle XX1 / X01 / NX / SX / GX 1×12 speed
and 2×11 speed MTB

2 × 12 TEETH

2020097 1 set

ABEC 5 with extra grease
Narrow / wide
Ceramic hybrid bearing

Compatible with:
SRAM Force / Red eTap AXS

12 + 14 TEETH

2020098 1 set

ABEC 5 with extra grease
Narrow / wide
Ceramic hybrid bearing

Upgrade for:
SRAM Force / Red eTap AXS

GET STARTED

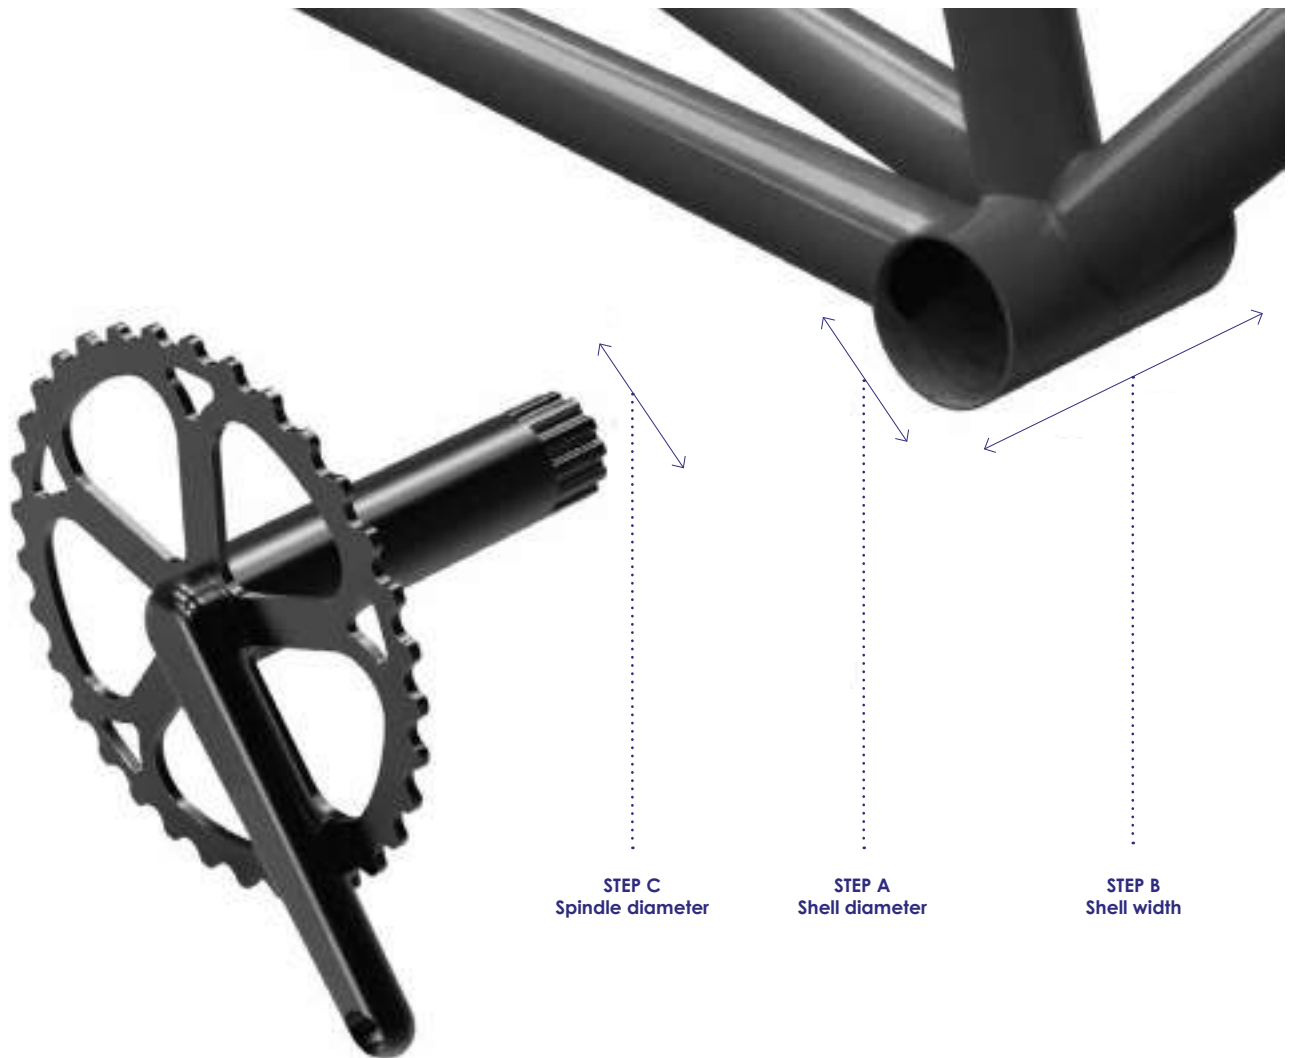

A bottom bracket shell can be threaded or nonthreaded, called thread fit and press fit respectively. It is important to know which type of shell you're working with and what the shell diameter and width are, in order to select a fitting bottom bracket.

The most common thread types in thread fit shells are BSA (English thread), ITA (Italian thread) and T47 (M47×1). A thread type bottom bracket is interlocked directly with the shell. Press fit shells come in various diameters and widths, most commonly PF30 (Ø46 mm), BB30 (Ø42 mm) and BB86/92 (Ø41 mm). Press fit bottom brackets are pressed into the shell using a press-in tool. Another dimension you need to know in order to select a fitting bottom bracket is the spindle diameter. Different brands and models can vary

widely, from Ø30 mm to tapered versions like Praxis (Ø30 mm – Ø28 mm). Differences between brands can also be as little as a few hundreds of millimeters.

Elvedes offers a basic range of bottom brackets, which can be easily adapted to specific types of spindles such as FSA Mega Exo and SRAM / Truvativ GXP using specific bearing caps or reducer kits.

Knowing all three dimensions, the guide on pages 69 - 71 can be used to select the perfectly fitting bottom bracket.

Elvedes also offers an enhanced version of the press fit bottom bracket, called the twist fit bottom bracket (see page 69). The twist fit bottom bracket can alternatively be used in a press fit shell. All bottom bracket bearings are produced complying with ABEC 5.

Replacement bearings and bearing caps are also available for maintenance.
