# RIM BRAKE PADS – GREY COMPOUND HS11/HS33 FOR MAGURA

The well-known HS11/HS33 brake pad for Magura's rim brake system is now also available in an extra abrasion-resistant compound. It can be recognised by its grey colour. Like the white compound and the standard compound (black), the grey compound is suitable for aluminium brake flanks. The new grey compound is available per pair on card, as BOX with 25 pairs and in bulk bag of 100 pairs.

# DISC BRAKE ROTORS NEW SIZES

Brake discs with a 140mm diameter (thickness 1.8mm) are widely used on race/gravel/cyclocross bikes. Elvedes has a new one-piece rotor for 2025 in this popular 140mm size. This new rotor is available in 2 connections.

**2024111**      **Disc brake rotor 6-hole  
Ø140mm d=1,8mm**

**2024112**      **Disc brake rotor centra-  
lock Ø140mm d=1,8mm**

## CABLE KITS

# UPGRADE SUPER FLEX

2021081 → 2024105

**Cable kit for dropper-post and lock-out remotes (excl. remote) super flex**

To potentially fit an inline adjuster, a ferrule and adjuster for 3.5mm cable diameter have been added to this cable kit. The added ferrule and adjuster have also been added to our assortment in a workshop packaging. Cable kit for dropper-post and lock-out remotes (excl. remote) super flex

**ELV2024015 50 End caps Ø3.65mm/Ø4.05mm x 12mm aluminium black**

**ELV2023167 15 Inline adjusters for 3.5mm outer cable**

# HYDRAULIC COMPONENTS ADDITION ORIGINAL BRAND HOSE EXTENSION & REPAIR KITS

In addition to offering our extension nipple in a set of 6 pieces with 12 compression bolts for 5.0 mm hoses, we are excited to announce a new set. This new set includes 6 extension nipples with 12 compression bolts designed specifically for 5.5 mm hoses like Tektro 5.5.

This expansion in our product range ensures greater compatibility and flexibility, making it easier for you to find the right solution for different hydraulic systems.

**2023010 Hydraulic hose replacement kit 2000mm for Magura with banjo**

**2023008 Hydraulic hose replacement kit 2000mm for Tektro 5.0 with banjo**

**2023015 Hydraulic hose replacement kit 2000mm for Tektro 5.5 with banjo**

**2024026 Hydraulic hose replacement kit 4000mm for Tektro 5.5 with banjo**

# HYDRAULIC COMPONENTS ADJUSTMENT HYDRAULIC HOSE FITTING BOX AND REFILLS

## **2015145 → 2024123 Hydraulic hose fitting box for original hose, refill available**

We are excited to introduce the updated Hydro hose fitting box and refills from our hydraulic components range. The contents of the box have been revised, leading to a change in article number.

The most significant updates to the contents include:

- The addition of new fittings for Campagnolo and Tektro 5.0.
- The consolidation of several compression bolts that previously had separate listings but shared the same dimensions across different brands.
- The inclusion of the extension nipple, enhancing the versatility of the kit.

Due to the merging of similar products, new article numbers have also been assigned to the refills, reducing the number of product codes for what are essentially identical items. Additionally, refills are now available in cardboard tubes instead of bags, making them compatible with our PARTNER and DOBLO displays.

This update ensures a more streamlined inventory and easier access to essential components.

## UPDATE IN PACKAGING

To ensure all our products remain accessible and suited to market demand, we have made adjustments to some of our hydraulic component offerings. Certain parts are less frequently needed in the market, so we have reduced the packaging size of several items from 10 pieces to 2 pieces.

In addition, we have introduced two new sets to our product range, offering a convenient solution for specific combinations of components. These changes are designed to better align with customer needs, offering more flexibility and efficiency when selecting the right parts for various applications.

## BOTTOM BRACKETS

# UPGRADE FOR SRAM DUB

~~2019117~~ → 2022088 Bottom bracket press fit SRAM DUB ONLY PF BB86/92 41mm

Elvedes has updated the press fit BB86/92 bottom bracket for SRAM DUB to also be compatible with SRAM Road-Wide cranksets. This new set includes two aluminium 2.5mm spacers. Depending on the manufacturer's bracket width, you must install these spacers for Road-Wide compatibility. To simplify installation, the new set also includes a manual with all possible spacer configurations for this bottom bracket.

**Bike components.**

# BOTTOM BRACKETS

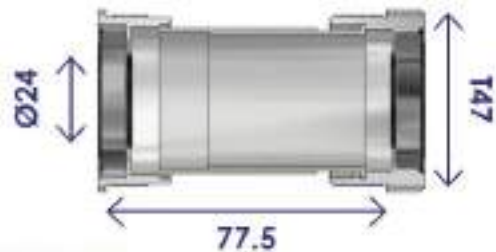

# CERVELO

Bike brand Cervelo has a unique bracket dimensions. Elvedes now has a number of new models for this size. Like most Elvedes bottom brackets, these models can be fully serviced.

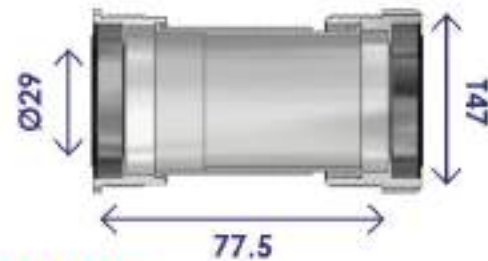

**2024046**      **Bottom bracket thread fit T47 > 24mm Shimano**
