DISC BRAKE PADS

XL workshop packaging

Bike components.

Our popular Deore-type disc brake pad (6854) is now also available in workshop packaging of 50 pairs in the compounds super soft (grey), soft (blue) and medium (black).

Packed in cardboard boxes compatible with the CADDY display.

6854-BOX50	50 pairs soft disc brake pads for Shimano Deore Mech./Deore M525
6854MC-BOX50	50 pairs medium disc brake pads for Shimano Deore Mech./Deore M525
6854T-BOX50	50 pairs super soft disc brake pads for Shimano Deore Mech./Deore M525

INNER CABLES

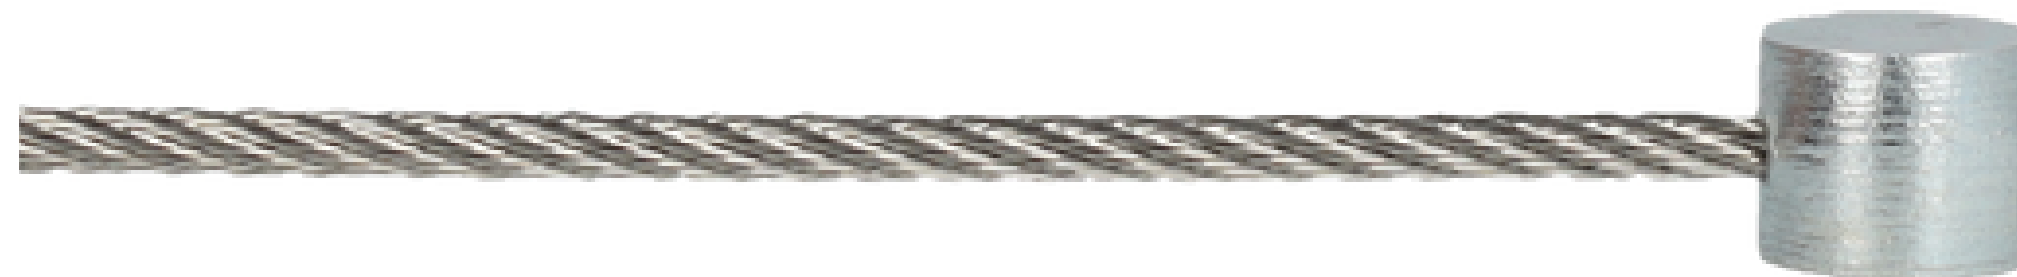

4 metres

Specially for cargo bikes and longtails with mechanical brakes, we have added a 4-metre version of the 49 strands inner cable to our range. The extra flexible 49 strands construction is ideal for smoothly following all the sharp bends you may encounter when routing cables on these types of bikes.

6427RVS-49-4M

Brake inner cable 4000 mm 49 wires stainless ø1.5 mm with T-nipple ø7 x 6 mm

CABLE KITS

Back from the past

Due to new demand we have added two cable kits back to our range. These cable kits are especially made for Shimano rollerbrake.

6275	Shimano rollerbrake cable kit 1800 mm/ 2000 mm galvanised black
6275RVS-3	Shimano rollerbrake cable kit 1800 mm/ 2000 mm stainless silver

CABLE PARTS

Sustainable packaging

To make our packaging more environmentally friendly, we are gradually switching from plastic jars to cardboard tubes. For some of our items this means the quantity within packaging will change. Therefore we have changed the item number for these items.

~~ELV2020099~~ → [ELV2025085](#) **10 adjusters for lever M10 aluminium black**

~~ELV2020100~~ → [ELV2025086](#) **10 adjusters for lever M7 aluminium black**

~~ELV1160PVC4-1~~ → [ELV2025039](#) **100 ferrules ø4.3 mm nylon 6 black**

~~ELV1160PVC5-1~~ → [ELV2025040](#) **100 ferrules ø4.3 mm nylon 6 silver**

~~ELV1160PVC4-3~~ → [ELV2025041](#) **100 ferrules ø5.0 mm nylon 6 black**

~~ELV1160PVC5-3~~ → [ELV2025042](#) **100 ferrules ø5.0 mm nylon 6 silver**

MAX BEARINGS

New size

Below bearing size is beside industrial bearing now also available as MAX bearing.

HEADSET BEARINGS

Workshop packaging

The most popular Elvedes headset bearings are now also available in workshop packaging. A workshop packaging contains 10 headset bearings. The box of the workshop packaging is made of recyclable cardboard.

This bearings workshop packaging also fits our PADFINDER display.

2017134-BOX10	10 Headset bearings 40 x 52 x 7 - 45° x 45°
2017135-BOX10	10 Headset bearings 30.2 x 41 x 6.5 - 36° x 45°
2017137-BOX10	10 Headset bearings 30.5 x 41.8 x 8 - 45° x 45°
2017140-BOX10	10 Headset bearings 40 x 51.8 x 8 - 36° x 45°

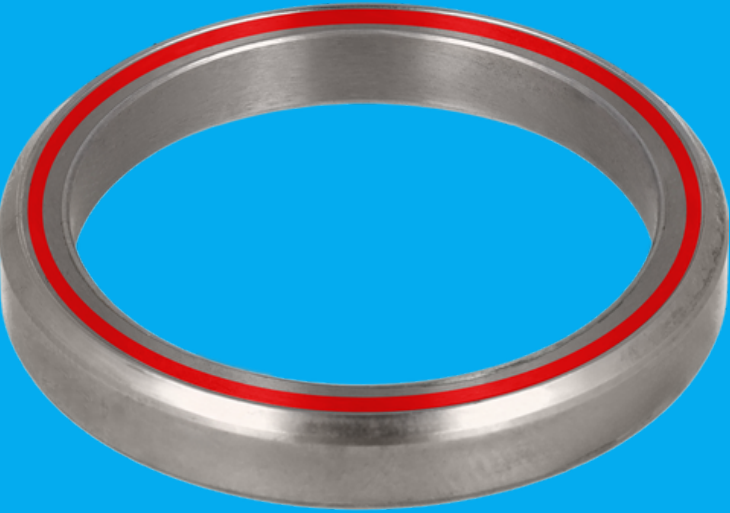

HEADSET BEARINGS

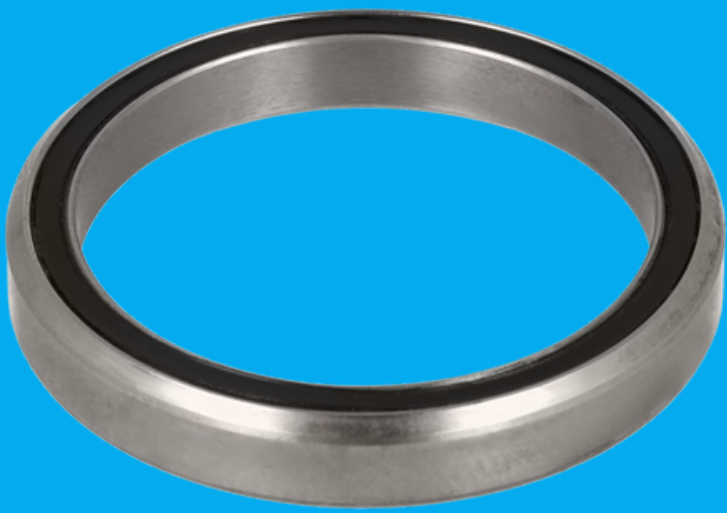

New sizes

The bike industry just keeps producing new sizes! We have added the following sizes to our range for the aftermarket.

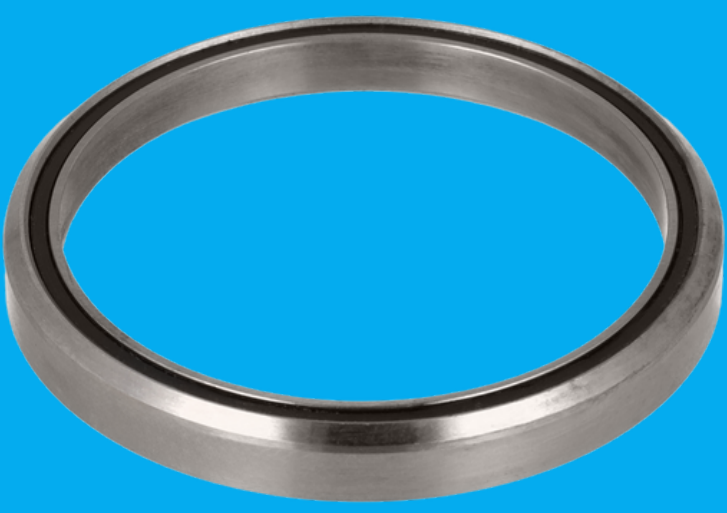

2024208	Headset bearing 40.5 x 49.5 x 6.5 - 45° x 45°
2025052	Headset bearing 36.8 x 45.8 x 6.5 - 45° x 45°
2025053	Headset bearing 47.8 x 56.8 x 6.5 - 45° x 45°

BOTTOM BRACKETS

BB right to SRAM DUB

Bicycles with a BB-right bracket and an SRAM DUB crankset can now also be equipped with an Elvedes twist fit bottom bracket. The twist-fit construction ensures a stable housing in the press-fit fitting of the frame, to avoid cups and bearings from moving in the frame while cycling. This prevents unwanted noises or wear on the fitting in the frame and the crankset.

Once installed, the bearings can be easily maintained and/or replaced without dismantling the entire bottom bracket.

Bottom bracket twist fit BB right to SRAM DUB

TOOLS

New hydraulic tools

Store a used brake caliper or brake lever without leakage! This smart universal plug fits into any 5 - 5.5 mm brake line bore. For a completely leak-proof seal, close this plug with the original compression nut or a compression nut with the same thread as that of the brake caliper or brake lever.

The material of this sealing plug is resistant to DOT fluid and mineral oil.

The plugs have a clearly recognisable red colour and are supplied in packs of 10 pieces.

2023003

10 plugs for temporarily sealing 5.0 - 5.5 mm brake hose bores of hydraulic brake calipers and levers, DOT and mineral oil resistant

TOOLS

New hydraulic tools

We have added a new high-quality bleed kit for SRAM mineral oil brake systems. This bleed kit is excellent for daily use in the workshop. The design is wear-resistant and has very well-fitting connections to prevent any leaks.

In these kits you will find straps to attach the syringes to the frame or fork, so that you have one hand free during the operation.

2025103	Professional bleed kit for SRAM Mineral
2025102	Adapters for professional bleeding kit for SRAM Mineral

TOOLS

Bike components.

New bottom bracket tool

Many of the bottom brackets we currently assemble have a very small mounting surface on which to place the tool for loosening and tightening. Unfortunately, we are unable to make any adjustments to create a larger mounting surface within the existing industry dimensions for bottom brackets. What we were able to improve, however, can now be seen in the tool we have specially developed for Elvedes bottom brackets.

This tool is suitable for Elvedes bottom bracket cups with 12T and 16T. The double-sided cap is equipped with a guide and clamping mechanism to prevent the tool from tilting during assembly or disassembly. This allows the required force to be transferred optimally and precisely.

Item no. 2024188 replaces bottom bracket wrench 2018086 and cap 2019069.

2024188

Professional bottom bracket socket 3/8" for
16T + 12T

TOOLS

More tools

This clever centra-lock socket designed by Elvedes is ideal for safely loosening or tightening a Shim. centra lock ring. The central guide pin ensures that the cap can never tilt and always maintains its grip on the thin, toothed edge of the centra lock ring.

Item 2024039 is suitable for all centra lock rings with external teeth. The tool is supplied with three alignment pins in three different diameters, so that it will align without play in combination with a quick release axle, 12 mm thru axle or 15 mm thru axle.

2024039

Centra-lock socket

Bike components.

TOOLS

More tools

A thru-axle construction has many advantages, and we are seeing more and more frame and fork manufacturers opting for this standard. Tools for reworking the thread are very useful in this regard. Elvedes has created a set for this purpose that includes all commonly used M12 variants. With the thread taps from the set, you can re-cut the thread in the frame or fork if there is minor damage or if there is corrosion or paint in the thread.

The set consists of three different taps and a thread gauge to determine the required thread pitch.

WORKSHOP

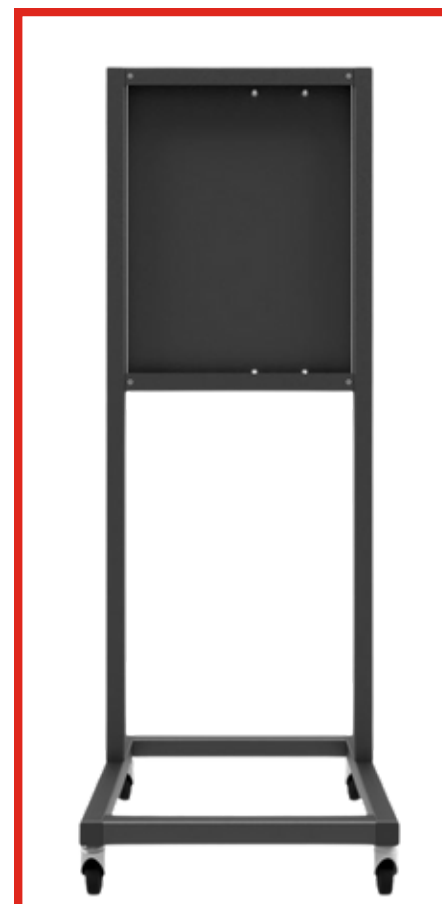

Update TRANSIT → Workshop Station

Evolved from the TRANSIT mobile display frame, the Workshop Station is a more compact version of its predecessor, but is able to hold an extra BOXER. This modification means that the displayframe obstructs the view of the workplace far less. The centre of gravity has been lowered, making the display more stable and easier to move. The setup with a second BOXER display and accompanying DOBLO display for 20 cardboard tubes is ideal for storing all new cables, brake hoses and connection parts.

2025007

Workshop Station all-in-one mobile display frame

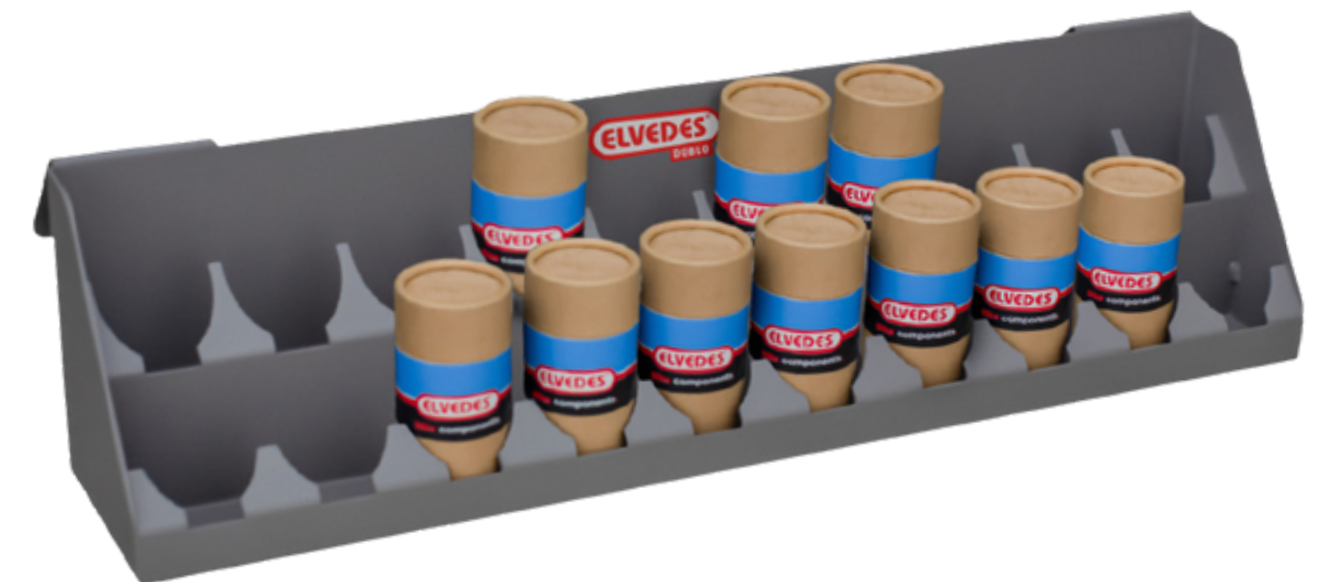

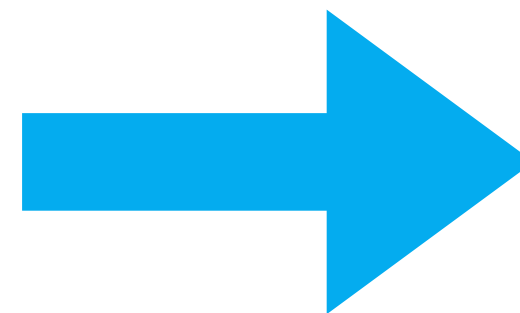

WORKSHOP

Update Partner → Doblo

The PARTNER display has been replaced by our new DOBLO display. The DOBLO has space to store up to 20 cardboard tubes of parts.

2024071	DOBLO display supplied with 20 cardboard tubes with cable/hydro parts of choice (price depends on content, display stand for free)

WORKSHOP

Syringe station

The syringes from the professional bleed kit can now also be stored filled. The syringe station can hold 8 syringes and up to 4 bottles of brake fluid. This station can be placed on the bleed station or on the workbench. It can also be mounted on the wall using the pre-punched slotted holes.

Like the Bleed Station, the Syringe Station has a wear-resistant DOT and mineral oil-resistant powder coating. The drip tray is also DOT and mineral oil resistant and removable to facilitate the disposal of fluids.

2024035

Syringe Station

WORKSHOP

Disc Brake Optimizer

Designed with everyday workshop use in mind, the Disc Brake Optimizer (DBO) offers smart features that make the bedding process easier, faster, and give reproducibly bedding results:

2025050

Elvedes Disc Brake Optimizer + FREE 30 pairs disc brake pads containing 6854T-BOX, 6854-BOX and 6854MC-BOX
